ATELIER
& DESIGN

*A laboratory of ideas, the place where we create pieces through a unique,
exclusive and customized process.*

*Products 100% made in Spain.
Products 100% customized to your needs.*

THE COMPANY / LA EMPRESA

Omio is an Engineering to Order (E.T.O.) company specialized in manufacturing custom designs for high-end hotels and restaurants. Using materials such as metal, glass, ceramics, wood, and plaster, Omio manufactures bespoke products including decorative lighting, column coverings, ceilings, steel structures, outdoor pergolas, bottle racks, bar counters...

The company does not offer standard products, instead providing tailored solutions to meet specific project requirements. Omio collaborates closely with interior design studios, positioning itself as a trusted partner from the concept stage to bring unique and innovative designs to life.

Our projects are structured into three main areas that reflect the different dimensions of design: challenges, public areas, and rooms. Each one represents a different way of understanding space, adapting to the functional and aesthetic needs of every project.

Omio es una empresa de Ingeniería Bajo Pedido (E.T.O.) especializada en el diseño y la fabricación a medida para hoteles y restaurantes de alta gama. Utilizando materiales como metal, vidrio, cerámica, madera y yeso, Omio crea productos personalizados que incluyen iluminación decorativa, revestimientos de columnas, techos, estructuras de acero, pérgolas exteriores, botelleros y barras de bar.

La empresa no ofrece productos estándar, sino que proporciona soluciones personalizadas para satisfacer los requisitos específicos de cada proyecto. Omio colabora estrechamente con estudios de diseño de interiores, posicionándose como un socio de confianza desde la fase conceptual para dar vida a diseños únicos e innovadores.

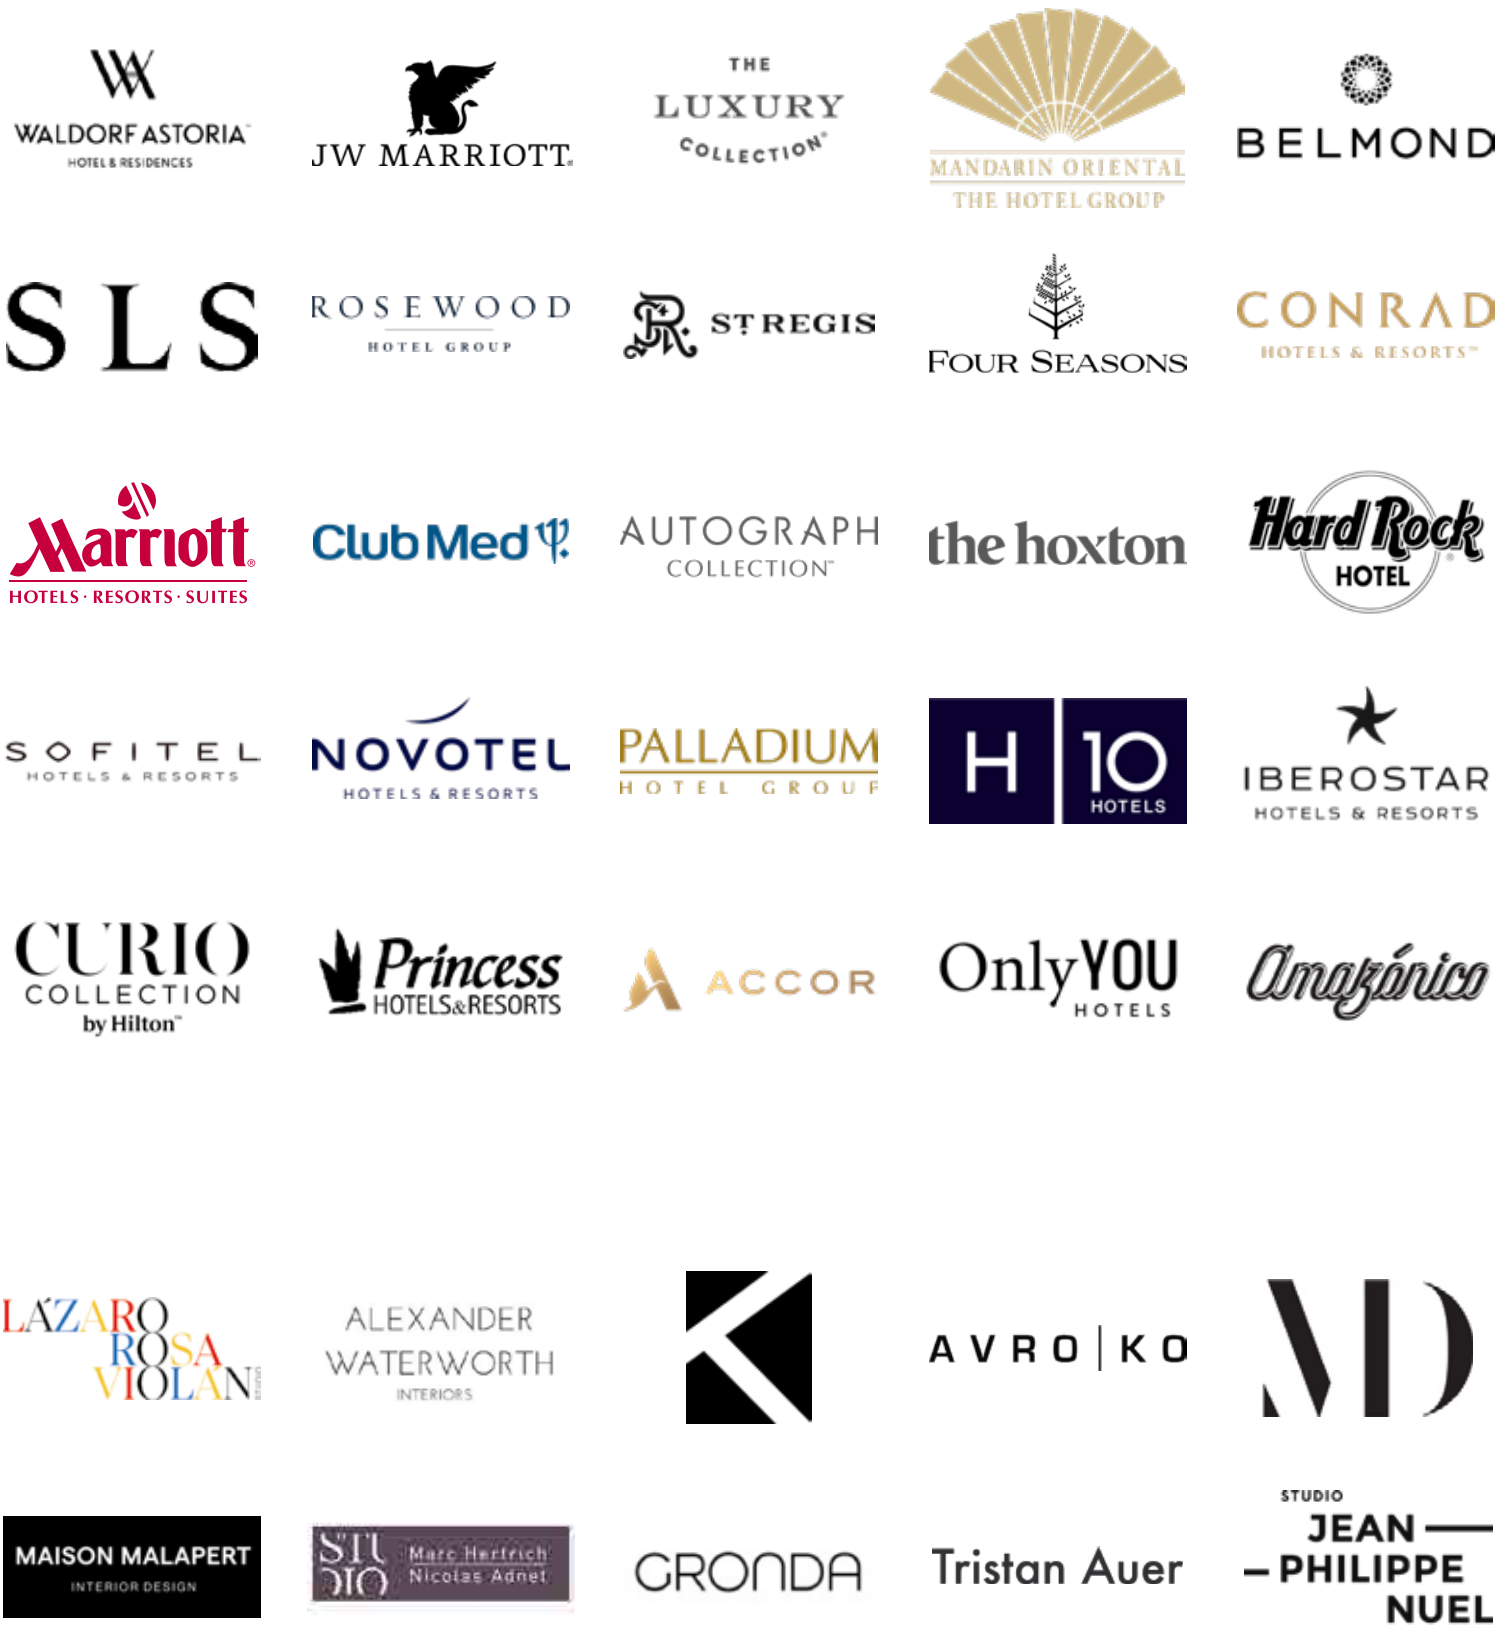

Nuestros proyectos se estructuran en tres ámbitos principales que reflejan las diferentes dimensiones del diseño: retos, zonas comunes y habitaciones. Cada uno de ellos representa una forma distinta de entender el espacio, adaptándose a las necesidades funcionales y estéticas de cada proyecto.
