industry

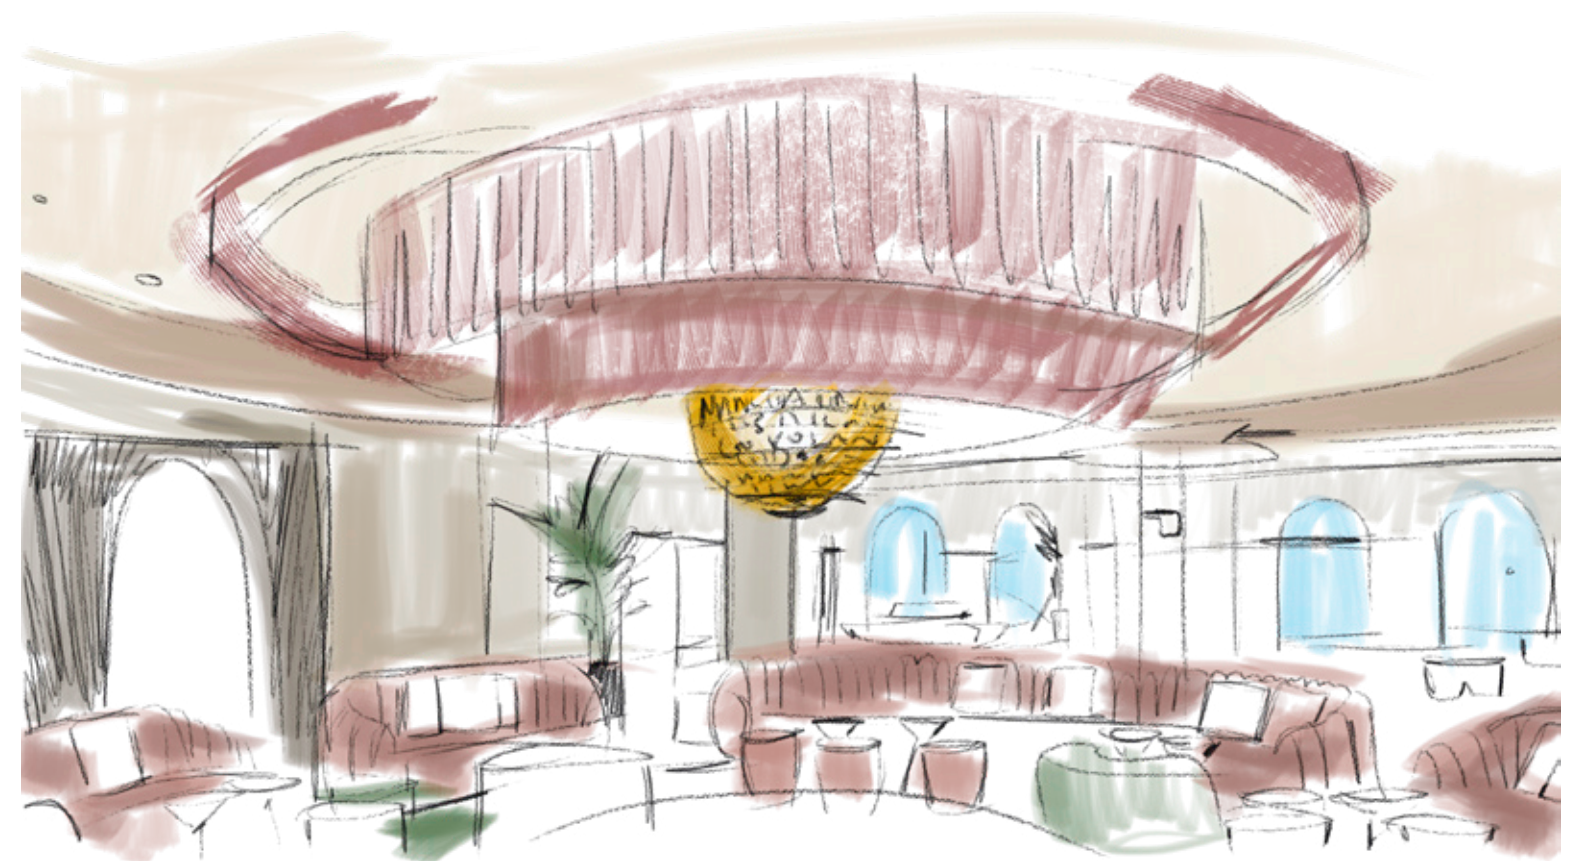

01 Sphere Lamp

Marbella

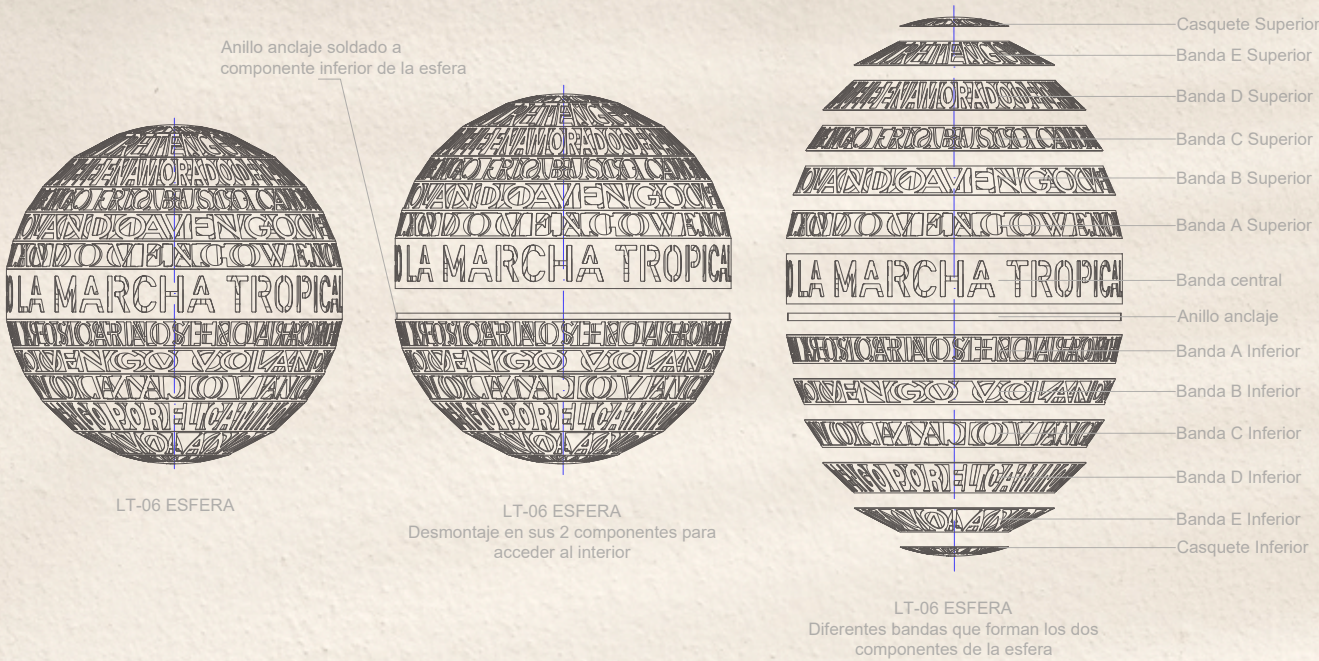

Design by Studio Gronda

2022

Inspired by the song composed by Kiko Veneno, "Volando voy", this lamp is reminiscent of a mythical disco ball, designed to decorate the best parties. This element is made of glass and aluminium structure with steel rods.

Made of laser-cut and bent steel painted with polyester with a gold finish. Composed of several rings that are welded together. It has a motor at the top that allows the lamp to go up and down and has an RGB system for the light to change colour

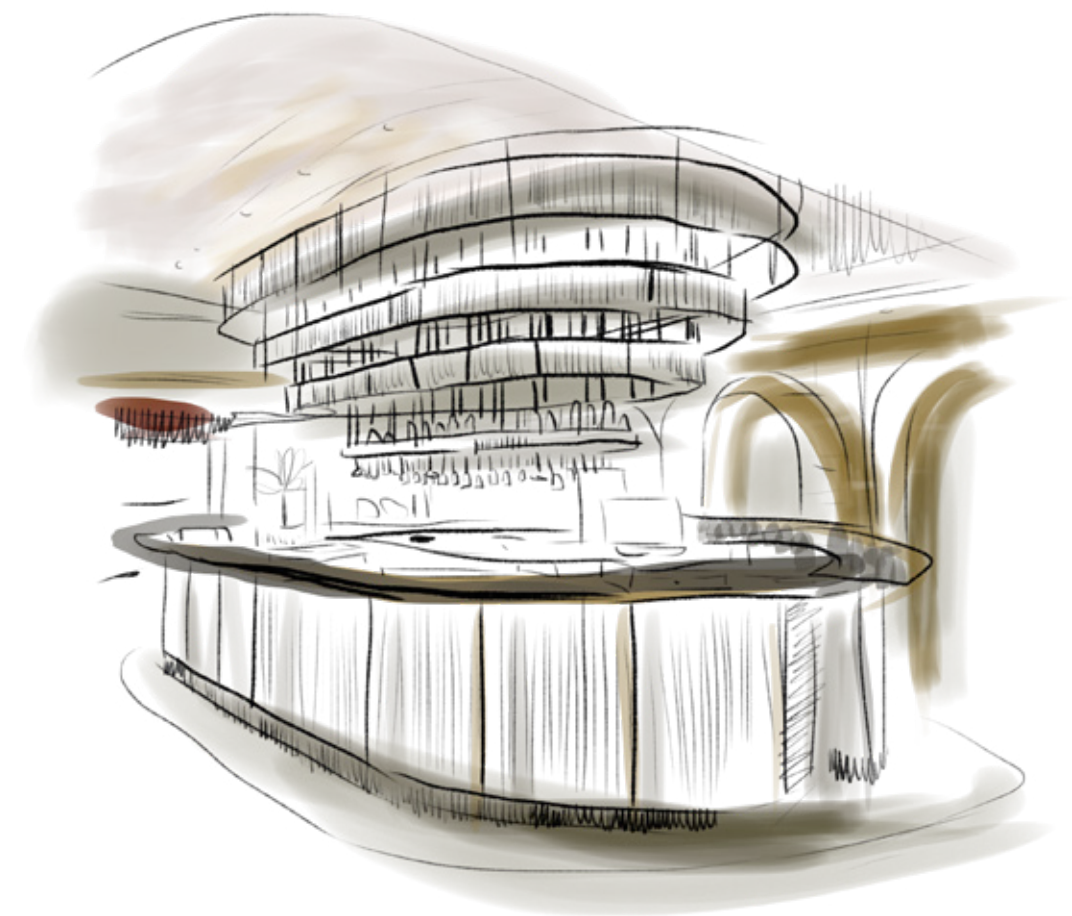

02 Bottle Rack

Marbella

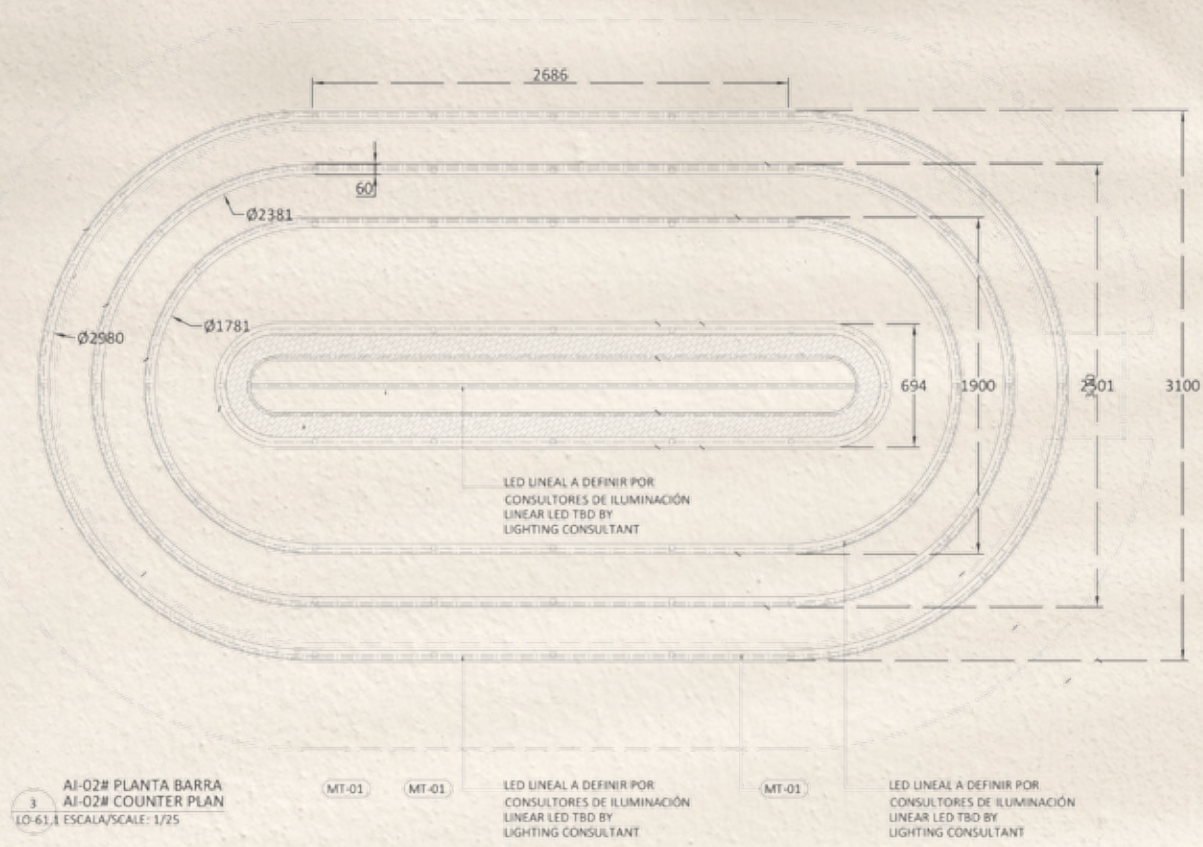

Design by Studio Gronda

2022

Organised in a descending structure, this bottle rack, like an architectural piece, mixes metal and glass to create a striking and awe-inspiring experience

Steel, ribbed glass, LED profiles with silicone diffusers. The bottle rack consists of 4 parts.
The LED strips and glass were first

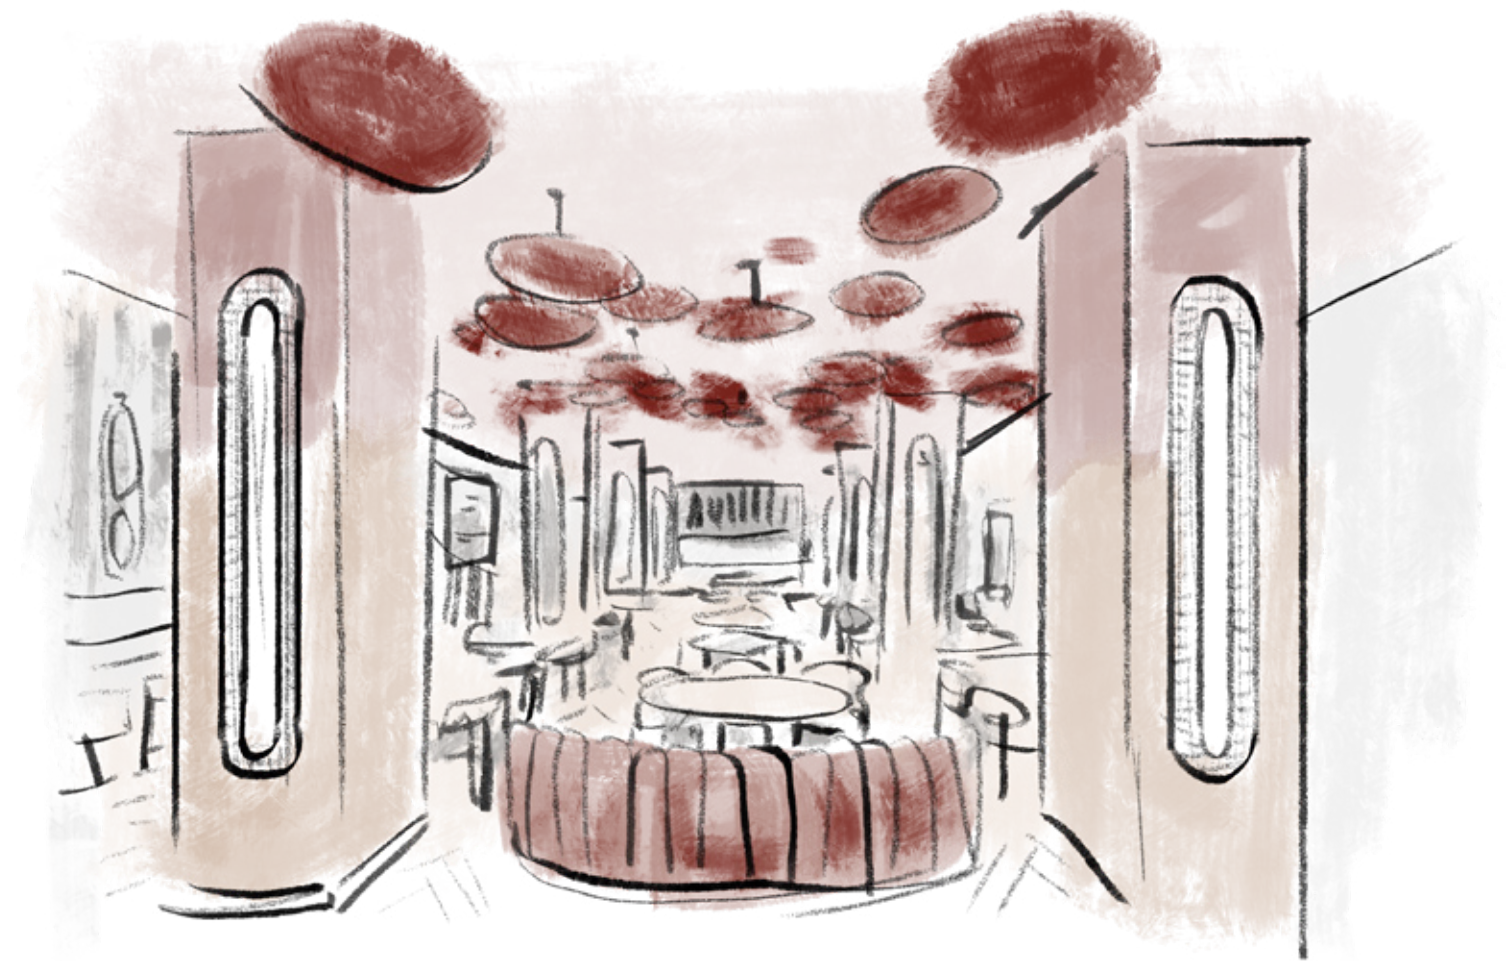

03 Sound Absorbing Pendant lights & applique

Marbella

Design by Studio Gronda

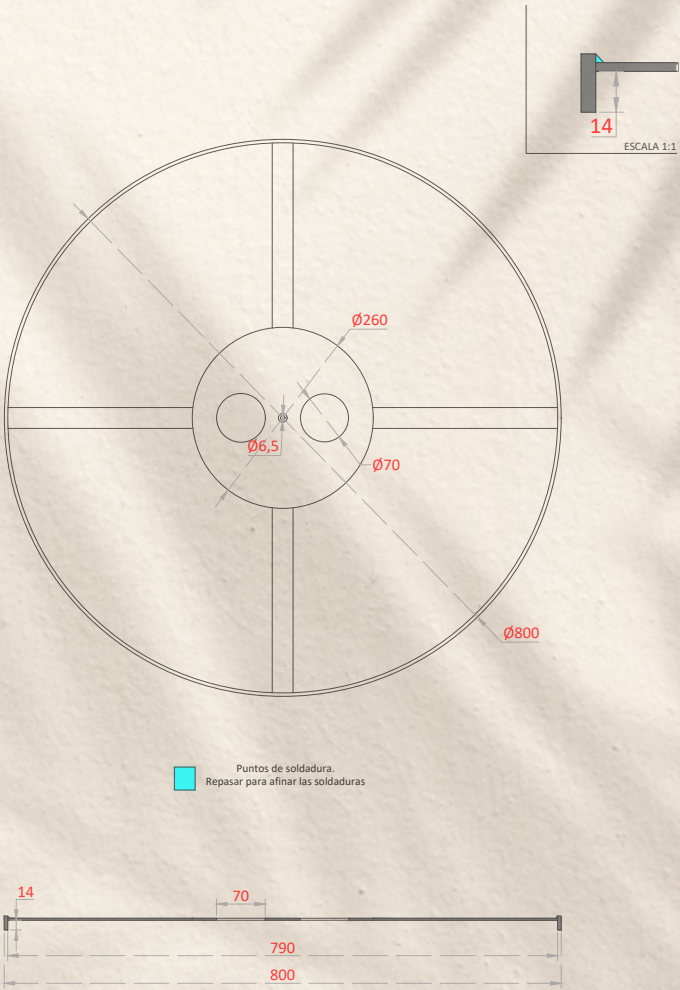

2022

Like vinyl records hanging from the ceiling, these unique lamps create a unique space as well as absorbing noise in the room.

Steel, ribbed glass, LED profiles with silicone diffusers. The bottle rack consists of 4 parts. The LED strips and glass were first

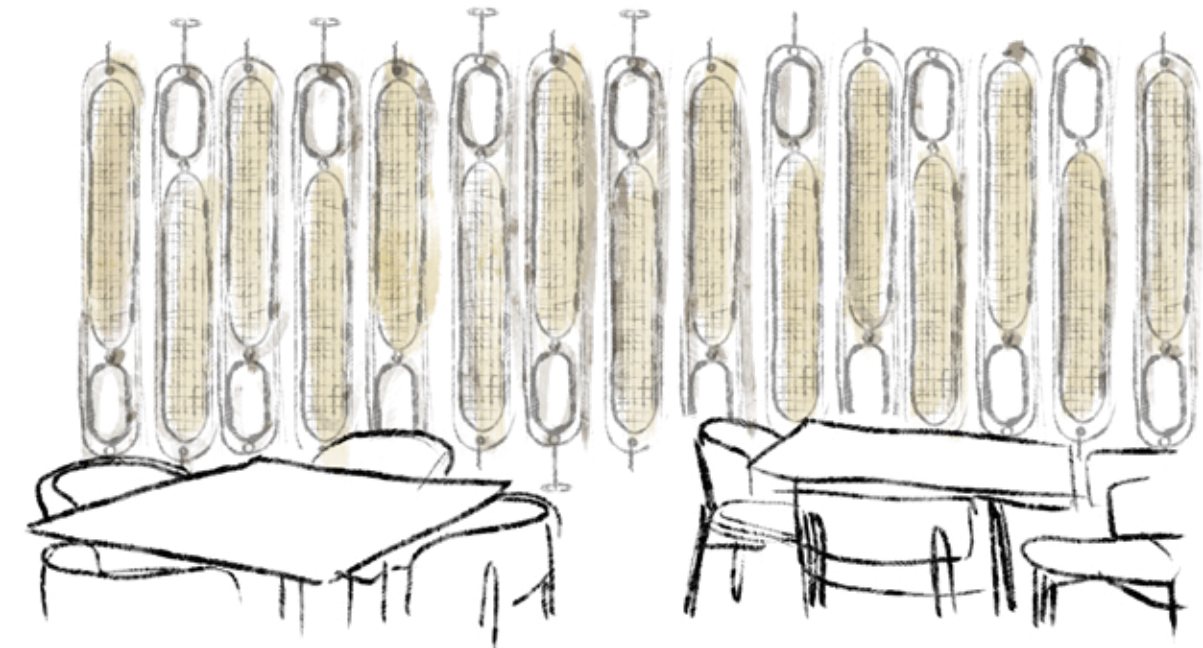

04 Room divider Screens

Marbella

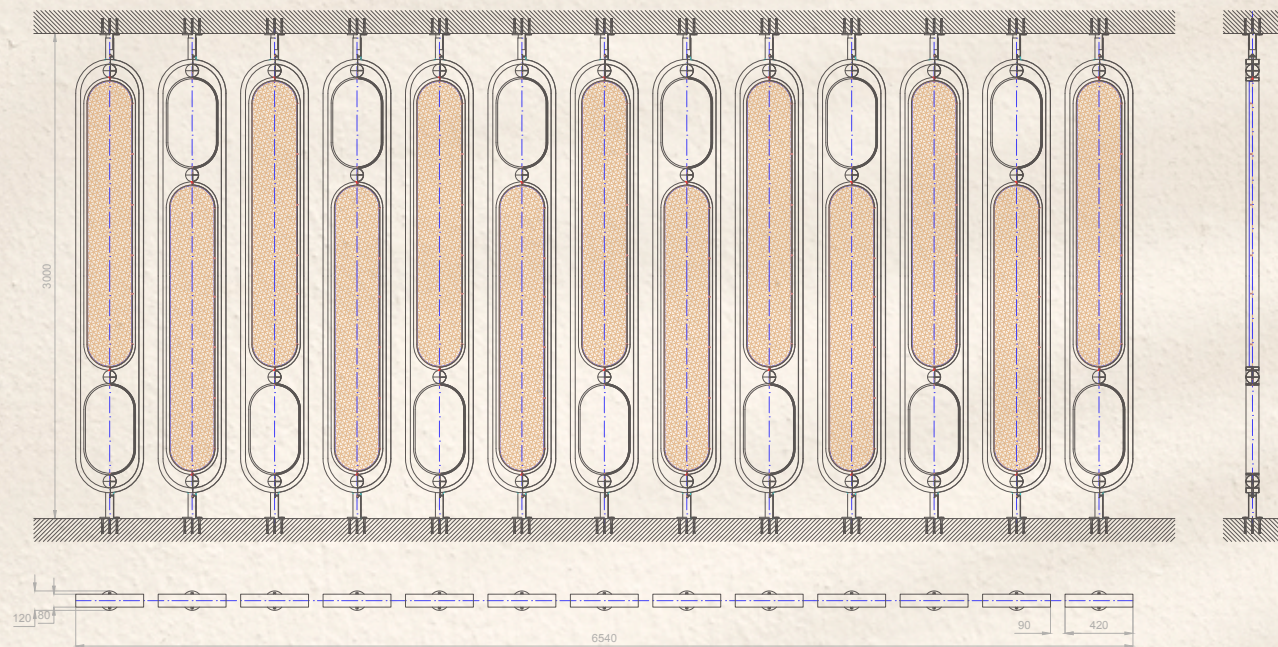

Design by Studio Gronda

2022

An ellipse-shaped structure combining metal and plant fibre, which repeats itself while creating a visual play of shapes that multiply upwards and downwards

Made of manually bent steel tube and rattan grille.
Assembled according to a pattern

Omio is an engineering and bespoke manufacture creative company in the global contract sector that specialized in the development of projects such as hotels, restaurants and commercial spaces.

We strive to create emotional connections between clients and our creative professionals.

1 . Design. concepts are designed based on the client's ideas. We listen and discuss in the context of the project. Possible improvements are designed and proposed to optimise the final product.

2. Development. All available tools are used to materialise the initial idea. The design department defines the details and establishes all the specifications necessary to facilitate production.

3 . Production. All the elements are tested by making prototypes and real pilot tests that the client can supervise, approve or propose adjustments. From there we put hands and machines in motion.

4 . Delivery and installation. Products are shipped from the factory directly to the destination; and teams travel and organise for successful installation.

5 .Customer service. Customer engagement is maintained throughout the time and process.
